

# Key Features of

Geomagic Wrap® 2013 is the most affordable, easy-to-use system for capturing point cloud data and converting it into 3D polygonal models and exact surfaces.

- **QUICKLY CONVERT PHYSICAL OBJECTS INTO ACCURATE 3D MODELS** for industrial design, fine art, archaeology, entertainment and more
- **NOW INCLUDES EXACT SURFACING** with AutoSurface function to convert meshes to surface models that are exportable as IGES or STEP
- **UTILIZE INTELLIGENT, ACCESSIBLE TOOLS** to easily perform comprehensive polygon editing and transform point cloud data into usable 3D models
- **ENHANCED SCRIPTING FUNCTIONS** allow you to speed up your workflow with customized automation for repetitive tasks and functions
- **AN EASY-TO-LEARN USER INTERFACE** with automated workflows streamlines functionality and allows you to perform operations faster
